

PITT OHIO PROVIDES END-TO-END SUPPLY CHAIN MANAGEMENT FOR NON-PROFIT

For several decades, PITT OHIO has provided pro bono truck transportation to a nonprofit organization dedicated to helping every baby sleep safer. PITT OHIO recently expanded its partnership with the non-profit to provide end-to-end supply chain management services, including ocean container transport, inland drayage transportation, and warehousing and fulfillment.

The non-profit was initially working with a mix of third-party logistics (3PL) providers for these services. PITT OHIO analyzed the data from the non-profit and created a one-stop shop solution, providing a single point of contact and streamlining logistics operations.

PITT OHIO now handles full ocean containers from China, provides LTL service with its North American partners, and offers warehousing and fulfillment services in its owned warehouses and other facilities across the country. By entrusting PITT OHIO with its entire supply chain, the non-profit has improved efficiency, saved money, and benefited from PITT OHIO's business relationships.
